4

Recommendation 2

Bringing about the perception that energy efficiency must be tackled everywhere, a massive information and education campaign must be launched

5

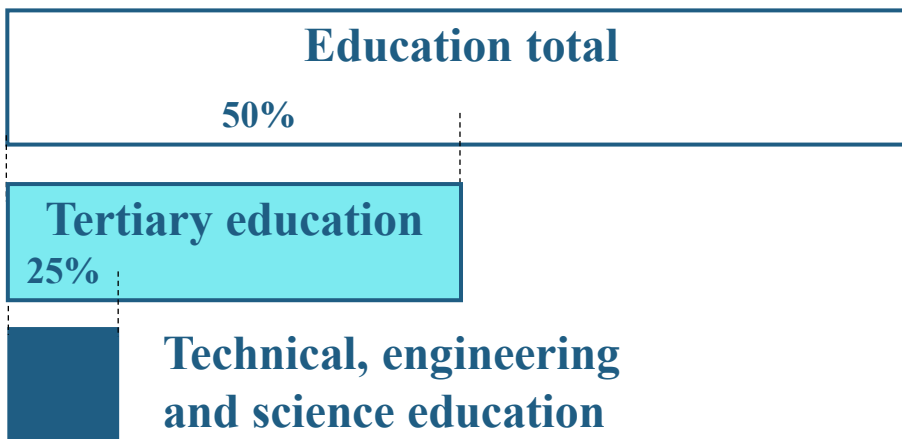

Recommendation 4

Ensure the leadership of public authorities with ambitious and visible investment plans in public infrastructure and buildings using where appropriate public private financing

6

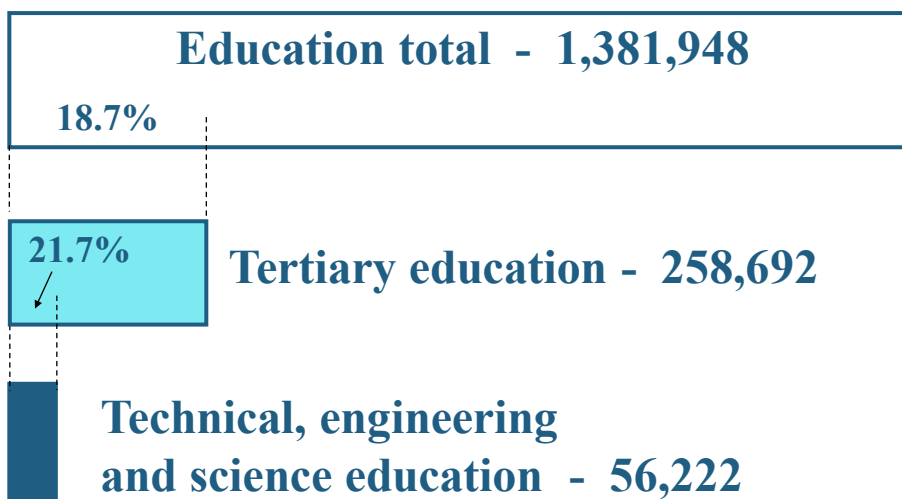

Recommendation 13

Education system

7

Education in Bulgaria 2007

8

Recommendation 16

Ensure that the New Legislative Framework brought about by the marketing of goods package, effectively leads to a real improvement in market surveillance in the EU

9

Recommendation 17

Achieve a far greater consistency and coherence of EU environmental regulation so as not to unnecessarily duplicate regulation, which only penalizes manufacturers in the EU

10
